

**SUPPLEMENTAL LIST OF TOWN SITES WHICH RECEIVED FILL FROM  
AGGREGATE PILE BETWEEN SUMMER 2013 AND DECEMBER 2016 (as  
of October 23, 2019)**

This list is an additional list of sites/projects where fill from the aggregate pile (managed by Julian Development from summer 2013 to December 2016) was potentially used. This list is based on invoices from Julian and input from the Conservation, Engineering and Public Works Departments. Tighe & Bond is reviewing this list to determine which sites will require testing. Some of these sites may not require testing because of circumstances such as the fill was used under asphalt or concrete, the material used was not part of the larger fill pile (for example asphalt millings) or based on continued conversations with Tighe & Bond, the State Department of Public Health and Department of Energy and Environmental Protection.

<b>Location</b>	<b>Exact Site/Address</b>
Beach Road	Jennings Beach entrance/901 Beach Road
Coral Drive	220 Coral Drive/repair collapsed culvert
Fire Training Center	Parking area between the building and the Burn Building-currently under asphalt
