Thank you for your participation in the Fairfield Tree Planting Program.

This program aims to plant a variety of trees of varying species, heights, etc., which provide shade and biodiversity, attract birds and other wildlife, and create a healthy environment. When selecting a tree for a location we consider a tree's full height at maturity in order to situate trees properly so they will thrive and not outgrow the allotted space. Trees offered in the program change due to availability and to maintain diversity.*

Together we have selected and will plant the following tree(s) where staked within the right-of-way area along the roadside of your property.

The cost per tree is \$200 payable on the Parks and Recreation website. Please follow this link to pay: <https://bit.ly/3nmB6uf>

Feel free to look up this species online. Keep in mind we will be planting a tree usually 1-½" to 2" in diameter, which is generally 5 to 10 years old.

Your payment signifies your approval to plant the aforementioned tree(s). If you have any questions about the staked location, please email us. The trees are planted in the spring and fall planting cycles.

Once the tree is planted, you agree to water and mulch it for the first two years and thereafter as needed. Properly established and cared for, this tree should beautify your property for years to come. We have detailed the watering, mulching and deer protection practices that are your responsibility and the instructions are available on our website. Please initial:

Watering instructions _____ Mulching instructions _____ Deer protection _____

I understand and agree. Sign here: _____

Sincerely,
Tom Corell
